## CODE EVALUATION

FSS Design Services can provide code evaluation, giving our customers the most current information in order to protect their assets and remain in compliance. From station bill assessment to placement of safety systems and equipment, we offer the peace of mind of knowing that you and your equipment are protected.

## FIELD SERVICES

FSS Field Services utilizes its experience to perform inspections and repairs of firefighting equipment, life saving products, fire detection systems, fire suppression systems and various types of safety equipment. Our field representatives hold various licenses and certifications. These experts assist businesses in combating INCs (Incident of Non-Compliance) and ensure customers meet or exceed compliance on all fire and safety-related issues.

## REPAIR & REFURBISH SERVICES

Trust FSS to restore your safety equipment to match or exceed industry safety standards with short turnaround. Fully trained for repair and certification of all makes and models of safety equipment, our staff utilizes top-of-the-line staging and repair areas including a bulk CO<sub>2</sub> tank, hydro room, paint booth, expansive laydown yard and ATN repair services.

## AIDS TO NAVIGATION / FIRE & GAS

To complement our offshore serviceability, we have an in-house Aids to Navigation repair facility, which enables us to provide faster turnaround of items sent in for repair or replacement if necessary. Our team of offshore representatives is unmatched in the knowledge of various types of Aids to Navigation equipment and fire and gas detection systems.

## SALES & RENTAL SERVICES

FSS offers a full lineup of industry-leading safety products for sale or rental to companies that wish to upgrade and expand their equipment supply. We offer quality products that meet or exceed safety standards from only trusted manufacturers.

“Safety always comes first —  
another person's life may depend on you.”

— Chad Meaux, President, CEO

## SAFETY SERVICES

For even the most critical operations, our safety representatives, USCG trained firefighters and medics are available for professional services. We offer these critical services to various markets and cater them specifically to their individual requirements. Our service helps to maintain crucial safety standards during production, and our qualified personnel can manage customers' daily safety meetings, JSAs (Job Safety Analysis), safe work permits and safety audits during projects. FSS representatives also provide hole-watch, confined space rescue and H<sub>2</sub>S services, as well as specialty on-site safety training.

## TRAINING SERVICES

To ensure the safest workplace conditions for our clients, FSS offers training services provided by our fully certified staff. Classes can be conducted onsite or in our state-of-the-art training room. FSS views the ongoing training of our personnel, as well as our customer's, an integral part of our success and we will ensure that the training is conducted with the same attention to detail and unparalleled service. Contact FSS for a full list of course offerings.
