Fire & Safety Specialists

Professionally protecting assets and lives

MISSION

To provide a working environment that attracts and retains the best professionals in the fire and safety community, thereby providing our customers with unmatched service. We shall assist in the protection of assets and lives through our commitment to quality products, vendor relationships, teamwork, employee training and our never-ending attention to every individual customer's needs.

OUR UNIQUE APPROACH TO BUSINESS

Fire & Safety Specialists Inc. (FSS) is committed to providing fire suppression systems and other safety measures to better protect your company. Our industry experts' experience is unmatched in the fire and safety industry. Unprecedented service, an honest approach to business, superior distributor relationships and a commitment to getting the job done right sets our company apart from the competition. Safety and training are key components to the success of FSS. We take immense pride in our ability to professionally protect our customers' assets and lives. Training for all personnel is an ongoing and integral part of our organization, and allows us to continue doing what we do best – save lives.

“Safety always comes first — another person's life may depend on you.”

— Chad Meaux, President, CEO

SINGLE-SOURCE SAFETY SOLUTIONS

FSS views every job as unique and strives to provide the best, safest solution to each and every client. From our field service group to our design group, we provide comprehensive solutions to meet any fire and safety contingency plan. FSS employees are experts who maintain current, critical certifications and licenses in order to provide innovative and knowledgeable solutions. Safety and performance-based training is top priority at FSS. Our employees are required to complete training courses that meet or exceed the expectations of our clients, regulatory compliance, as well as our own strict internal standards. We are leaders in setting industry standards, offering 24-hour service and support and using only state-of-the-art equipment to ensure maximum protection.

DESIGN SERVICES

From fire detection to suppression, FSS provides turnkey safety solutions that are specifically customized to your company's needs. Our expert designers offer a complete solutions package, and our OEM relationships ensure we can address potential problems immediately and efficiently.

DESIGN SYSTEMS

- Gas Detection Systems
- Fire Detection Systems
- Clean Agent Suppression Systems
- Water Mist Fire Suppression Systems
- Foam Fire Suppression Systems
- Dry Chemical Suppression Systems
- Deluge Systems
- Paging and Alarm Systems
- Aids to Navigation Systems
- CCTV

Customized safety plans and equipment enable FSS to provide the optimal solution for each client. Close relationships with vendors and distributors allow FSS to offer the highest quality, latest products available. Personnel provide continuous support for emergency situations and can be scheduled for monthly, quarterly, semiannual or annual routine maintenance.

A fire safety plan is critical to protecting and reducing loss if a disaster happens. The goal of FSS is to protect your assets in the case of catastrophic events. We help to assure that customers meet or exceed compliance on all fire and safety-related issues.

OEM relationships at FSS give firsthand knowledge of potential problems and risks of the industry. We maintain vendor/master distributorships with the largest fire safety equipment manufacturers in the world, providing us timely information about current industry trends and news. Strong OEM relationships are the only means of accomplishing the most detailed and professional factory certified training for FSS personnel.

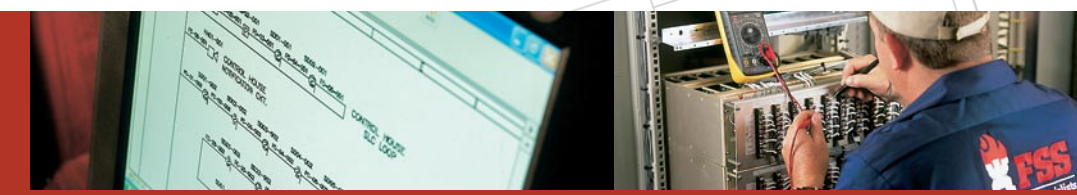

CODE EVALUATION

FSS Design Services can provide code evaluation, giving our customers the most current information in order to protect their assets and remain in compliance. Our professionals have the tools and resources required to help mitigate hazards and can assist the end user during this critical decision-making process. From station bill assessment to placement of safety systems and equipment, we offer the peace of mind of knowing that you and your equipment are protected.

Expert designers on staff at FSS provide the expertise, experience and technical skills for complete, functional and reliable engineered systems. Services include on-site surveys, development of system specifications, computer-aided design, drafting and installation, as well as commissioning of engineered safety systems. With personnel available around the clock, our design services department meets the critical needs of clients.

5 STEPS OF DESIGN SERVICES

- 1) **Evaluation**
Evaluate each hazard on an individual basis.
- 2) **Estimate**
Estimator will provide competitive & professional estimate for review.
- 3) **Design System**
FSS will design a customized system solution to address any hazards as revealed by our evaluation.
- 4) **Installation**
Our team of professional installers will then implement the system solution within the designated schedule.
- 5) **Final Testing Phase**
Final acceptance testing with a company representative or Authority Having Jurisdiction (AHJ) to assure system performance and acceptance as per design.

REPAIR & REFURBISH SERVICES

As the sole provider of in-house repair and refurbishment services in Lafayette, FSS is capable of restoring your safety equipment to match or exceed industry standards with short turnaround. Our experienced staff is fully trained for repair and certification of all makes and models of safety equipment. The facility our experts utilize for this service includes top-of-the-line staging and repair areas including:

DRY CHEMICAL RECHARGE

BULK CO₂ TANK

HYDRO ROOM

AIDS TO NAVIGATION / FIRE & GAS

The FSS team of offshore representatives is unmatched in the knowledge of various types of Aids to Navigation equipment and fire and gas detection systems. At FSS, we take pride in our ability to service various types of paging and alarm systems on-site. To complement our offshore serviceability, we have an in-house Aids to Navigation repair facility, which enables us to provide faster turnaround of items sent in for repair or replacement if necessary. The FSS equipment specialists are supported by management with unmatched experience and their own earned reputation for getting the job done correctly.

EXPANSIVE LAYDOWN YARD

PAINT BOOTH

CYLINDER INSPECTION

SALES & RENTAL SERVICES

FSS offers a full lineup of industry-leading safety products for sale and rental to companies that wish to upgrade or expand their equipment supply. We offer quality products that meet or exceed safety standards from only trusted manufacturers.

FIRE PUMPS

FSS provides the sale and rental of fire pumps in compliance with the latest NTL 2006-G04. Packages come equipped with 25 HP 7 Stage Fire Pumps capable of meeting flow requirements of 33 CFR 149.453 and API 14G standards. FSS can customize several configurations and ship packages to customers on location with cable, cooling shroud and make-up flange.

TEMPORARY BARRICADE SYSTEMS

Our temporary barricade system provides a portable, no-weld solution for customers who need to transform a hazard zone into work zone at a moment's notice. Compact in size and with design that exceeds CFR 1910 and 1926 standards, this easy-to-assemble kit eliminates downtime and facilitates workplace safety on the fly.

PRODUCT LINEUP ALSO INCLUDES:

- 125-lb. / 300-lb. Wheel Unit Fire Extinguishers
- Hand-Portable Fire Extinguishers
- Life Jackets / Life Jacket Boxes
- Hard Type and Inflatable Life Rafts

SAFETY SERVICES

FIRE WATCH • SAFETY REPRESENTATIVES

For even the most critical operations, our safety representatives, USCG trained firefighters are available for professional services. We offer these critical services to various markets and cater them specifically to their individual requirements. Our service helps to maintain crucial safety standards during production, and our qualified personnel can manage customers' daily safety meetings, JSAs (Job Safety Analysis), safe work permits and safety audits during projects. FSS representatives also provide hole-watch, confined space rescue and H₂S services, as well as specialty on-site safety training.

These classes can be conducted onsite or in our state of the art training room. FSS views the ongoing training of our personnel, as well as our customer's, an integral part of our success and we will ensure that the training is conducted with the same attention to detail and unparalleled service.
